

Environmental and Sustainability Policy

Project Environmental Solutions Ltd. is committed to responsibly managing its environmental impacts and adopting the principles of sustainability in conducting its business activities.

We will:

- Comply with relevant environmental legislation.
- Consider environmental and sustainability issues when planning, preparing and delivering our consultancy projects for our clients.
- Advise our clients, where appropriate, on the environmental and sustainability issues associated with their operations and projects.
- Minimise and mitigate our significant environmental impacts through the continual development of our environmental management system procedures as determined by our business requirements.
- Provide suitable training to our staff on environmental and sustainability issues through appropriate environmental training.
- Conduct an annual review of our environmental and sustainability policy and objectives to ensure it still meets the needs of the Company.
- Ensure our environmental and sustainability policy is available to our stakeholders.

In order to achieve the aims of this policy and continually improve our environmental performance, we will continue to develop our management system in accordance with the principles of BS EN ISO 14001:2004.

Philip Smith - Director
